
From **pixels** to products.

I design thoughtful digital experiences and turn them into functional, user-focused products.

DINITHA NAVANITH
Software Engineering Undergraduate · Sri Lanka

Currently
UI/UX Designer & Developer Trainee

HOW I THINK

I design with purpose,
not decoration.

I'm a UI/UX designer and developer who enjoys turning complex ideas into simple, useful digital experiences. I care about how things look, but more importantly, how they work.

01 Understand

I start by understanding the people, problem and context behind a product.

02 Simplify

I remove the unnecessary and focus on what makes the experience clearer.

03 Build

I bring ideas to life through thoughtful design and code.

Design × Code

I don't stop at the design. I enjoy taking an idea from the first sketch to a polished interface — designing the experience, building the front end, and making sure the final product feels as good as it looks.

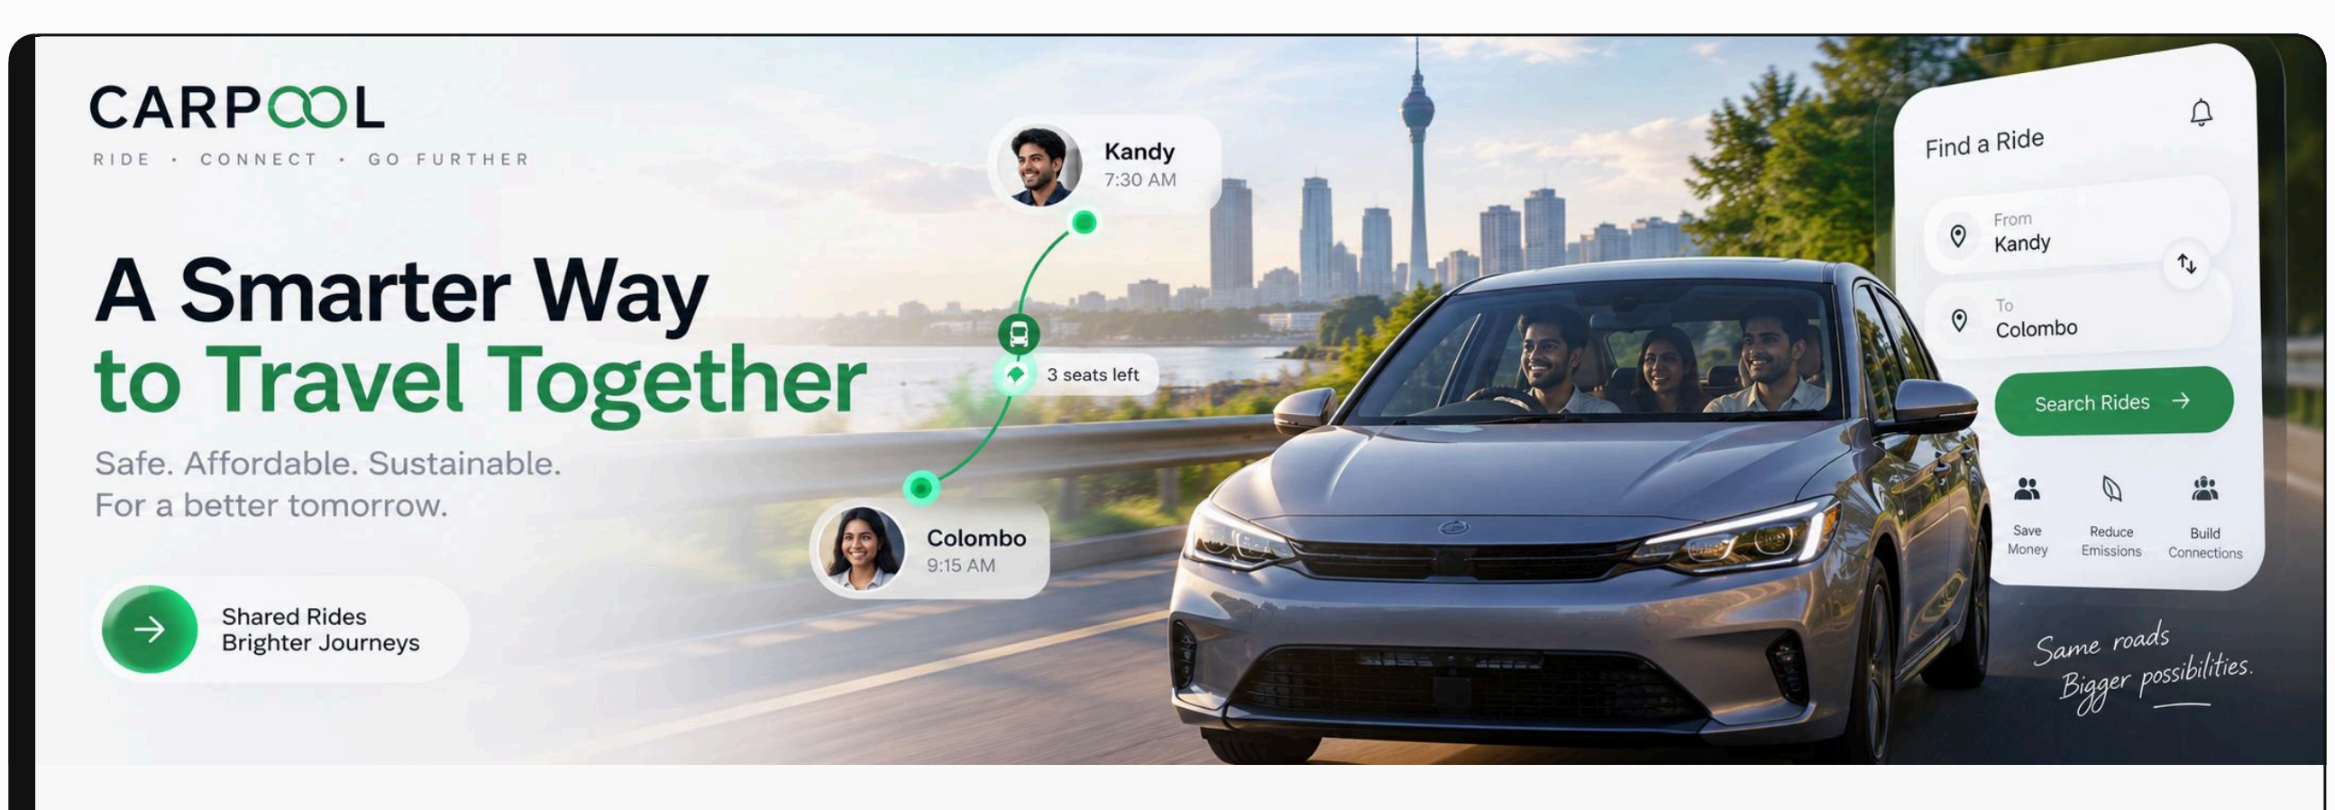
DESIGN
- Figma
- Wireframes
- Prototypes
- Design Systems

BUILD
- React
- HTML / CSS
- JavaScript
- Node.js

Good design makes things easier to understand.
Good development makes them real.
I enjoy doing both.

SELECTED WORK

A few things I've designed,
built and brought to life.



CARPOOL

Designing a smoother everyday ride-sharing experience.

UI/UX PRODUCT DESIGN REACT NODE.JS

01

JOURNEY

Learning, designing,
Learning, designing,

From university projects to professional product work, every experience has shaped the way I think, design and build.

LET'S TALK

Have an idea?
Let's make it real.

Have an idea?
Let's make it real.

Whether you're looking for a designer, developer, collaborator, or simply what to say hello - i'd love to hear from you.
